

Sagacent Technologies Named in the MSP 501 for the 8th Time

Santa Clara, CA, November 30, 2023—Now in its 15th year, the Channel Futures MSP 501 is the IT channel's first, largest, and most comprehensive survey and ranking of managed service providers (MSPs) worldwide.

According to Channel Futures, "Companies honored on the list stand out among an astounding number of applicants who pride themselves on their technical talent, growth-oriented business models and strategic partnerships with industry-leading vendors and tech suppliers."

Being included in this ranking is an honor for Sagacent Technologies because we're far from the biggest company in the list. But we are unique in that Sagacent has been featured in the list an astonishing 8 times during the 15 years Channel Futures has published the ranking!

About the MSP 501
